DYNAPAC SOIL COMPACTORS

Dynapac CA1300, CA1400, CA1500, CA2500, CA2800, CA3500, CA3600, CA4000, CA4600, CA5000, CA5500, CA6000, CA6500, CA702
PRESENTING THE COMPLETE DYNAPAC SOIL COMPATOR RANGE These machines and their variants, are the fifth generation of Dynapac CA single drum vibratory rollers. With their state-of-the-art designs and unique features, they represent yet another example of Dynapac’s innovative thinking.

A NEW PERSPECTIVE ON COMPACTION

THE COMPLETE PICTURE
There is much more to soil compaction than the roller. When we developed this generation, we applied our unmatched know-how in the field of soil compaction to the entire compaction mission. This ranges from planning the task, through the rolling phase, to analyzing the results once the job is complete.

FAST, SIMPLE, PROFITABLE
Our aim is to make your compaction mission as fast, simple and profitable as possible, from beginning to end. To achieve this, we focus on three clear steps: Preparation, Performance and Protocol – we call it Mission Compaction.

OPTIMIZED PARAMETERS
Provide superior compaction performance.

ACTIVE BOUNCING CONTROL
Prevents misuse to the machine and over-compaction.

CROSS-MOUNTED ENGINE
A revolution in serviceability.

LOW NOISE AND LOW FUEL CONSUMPTION
Sustainability and working environment in focus.

MISSION CONTROL
Puts you in full control of the entire compaction process.
EXPERTISE IN EVERY ASPECT

Experience is the base of excellence. Dynapac will always help you to reach perfection.
DYNAPAC SOIL COMPACTOR RANGE

**SMALL, MEDIUM, LARGE OR XL**

**S**

**DYNAPAC CA1300, CA1400, CA1500**

The small Dynapac soil compactors are vibratory rollers designed for compaction operations in pipe trenches, compacting roads, streets and parking lots. Due to the small size and exceptional maneuverability, these rollers are also well suited for compaction on large building foundations and industrial construction sites and in cramped spaces in connection with refilling work. The rollers are also suitable for repair work and gives good maneuverability even on very steep slopes.

All types of supporting and reinforcement courses can be compacted.

The PD version, equipped with pads and drum drive, is especially suitable for the compaction of silt and clayey soils.

---

**M**

**DYNAPAC CA2500; CA2800, CA3500, CA3600; CA4000, CA4600**

The Dynapac CA2500 - CA4600 are medium heavy vibratory soil compactors, typical utility machines, designed for long working days in tough applications. All types of base courses and reinforcement courses can be compacted to considerable depth. The 35 mm hitch drum ensures excellent resistance to wear - even in compaction operations on rockfill.

The padfoot version has its major range of application on cohesive material and disintegrated rock. All types of base courses and subbase courses can be compacted.

---

**Operating mass**

- **CA1500D**: 5000 - 7000 Kg (11,000 - 15,500 lbs)
- **CA1500PD**: 10 000 - 15 000 Kg (22,000 - 33,000 lbs)

**Static linear load**

- **CA1500D**: 13 - 20 kg/cm (73 - 115 pli)
- **CA1500PD**: 25 - 40 kg/cm (140 - 225 pli)

**Drum width**

- **CA1500D**: 1370 - 1676 mm (54 - 66 in)
- **CA1500PD**: 2 130 mm (84 in)
- DYNAPAC OFFERS THEM ALL

**DYNAPAC CA5000, CA5500, CA6000, CA6500**

The CA5000, CA5500, CA6000 and CA6500 are heavy rollers designed for the toughest compaction applications. Rockfill can be compacted in 2-meter thick layers, in which the size of the rocks can be up to 1 meter in diameter. The smooth drum shell thickness is 43 (CA5000) and 48 mm (CA 5500, 6000 and CA6500), which gives a long productive lifetime for compaction of rockfill, gravel and sand. Pad-foot drum is available for compaction of silt and clay materials. These rollers are a great investment for the bigger projects as compaction performance and capacity are outstanding.

**DYNAPAC CA702**

The CA702 is Dynapac’s heaviest vibratory soil compaction roller. The machine has been specially developed for the heaviest large-scale compaction work on earth, rockfill and most types of soils and clays. Typical applications include dams, airfields, harbors and major railway and road projects.

MAKE USE OF SCIENCE IN COMPACTION

PREPARATION - COMPBASE SOFTWARE
CompBase is the only recommendation tool in the industry that can provide detailed compaction data and capacity information based on full-scale tests. The machine and method selection is based on the material to be compacted and provides information on the expected depth effect and degree of compaction after any given number of passes. In addition to this; CompBase recommends suitable amplitude and rolling speed for optimum performance.

PERFORMANCE - DYNAPAC COMPACTION OPTIMIZER (CA3500/4000/5000/6000)
We all know that the whole idea with compaction is to reach the correct set of parameters for the type of work in question. There is no point in overdoing anything – it only costs time and fuel, without improving the final result. Dynapac Compaction Optimizer, DCO, is an innovative system based on the well-proven compaction meter. The stiffness of the ground constitutes the input value for the setting of amplitude of the vibratory drum. The operator gets full control and the project benefits from this in every respect.

PROTOCOL - DYN@LYZER FOR SOIL WITH GNSS
In all projects it is vital to do the right thing - and to do things right. Also in compaction, solid documentation is worth a lot more than spot checks and guesswork. Dyna@Lyzer, includes a field computer which is fed continuously with measurement data – not just random checks. The operator reads the results in real-time and can easily reach top performance from the beginning. The Dyna@Lyzer is a unique Dynapac feature that improves the result of every job. A real profit maker. The results of the compaction are shown directly on the screen of the portable Dyna@Lyzer unit. The measurement values can easily be transferred to a desktop computer.
**MAP GROUND CONDITION**

Map the ground condition and the material to be compacted. If your CA roller is equipped with a Compaction Meter with Dyna@Lyzer (with GNSS), you can run the machine over the area in advance. This will give you a chart showing ground condition and material to be compacted, at the same time revealing weak areas before you start rolling.

**SELECT MACHINE AND COMPACTION STRATEGY**

Dynapac CompBase software bases the selection of machine and method on the material to be compacted. The software provides information on the expected depth effect and degree of compaction after any given number of passes. CompBase also recommends suitable amplitude settings and rolling speed for optimum performance. This saves fuel and reduces environmental impact.

SELECT MACHINE & COMPACTION STRATEGY
CALCULATE COMPACTION ACHIEVEMENT

Prior to compaction - Preparation

MISSION PLANNING FOR EFFICIENCY AND ECONOMY
FEEDBACK ON PROGRESS AND POSITION
Your fifth generation Dynapac CA soil compactor is warmed up and ready to roll. Start compaction and the Dynapac CA roller, with Compaction Meter and Dyna@Lyzer, gives you continuous information on the increase in compaction and reveals weak areas. Compaction results are displayed on the computer screen, allowing you to focus the compaction energy on the ground surfaces that need additional compaction. The screen also displays the position of the roller in relation to a selected reference line for the section, so you always know precisely where you are.

SUPERIOR COMPACTION PERFORMANCE
The new CA rollers have static linear loads in steps of 5 kg/cm. This, combined with an optimum high amplitude, enables you to compact rockfill down to 1.65 meter with a Dynapac CA4000D. The better depth effect means higher volume capacity and less passes to reach compaction specifications, thus saving fuel and reducing cost. Environmental impact is also lower. If the roller is equipped with the Dynapac “Silent Weights” eccentric concept, this enhances compaction performance even further.

ACTIVE BOUNCING CONTROL (ABC)
This feature on the new CA generation prevents damage and prolongs the lifetime of the roller by eliminating drum double jump, or over-compaction – an action that can destroy components in the machine. ABC is standard in Dynapac Compaction Meters.
THE MACHINE TAKES THE STRAIN
The ergonomically designed, air-conditioned cabs on the new generation offer a high level of operator comfort and good visibility over the work area and surroundings. The noise level from the engine is very low. A feature unique to Dynapac CA rollers is a spin-around seat, steering module and display cluster, which allows movement of up to 180 degrees without stress to the neck or body.

SAFETY FIRST
Safety functions include Electronic Drive Control with a “quick brake” function, which shortens braking distances if the lever is moved very fast, and a tilt indicator. Loss of traction, even in the toughest conditions, is swiftly counteracted by an easy-to-use toggling gear shifting system, or with an anti-spin system.

LOWER FUEL CONSUMPTION AND ENVIRONMENTAL IMPACT
The engines can have the Dynapac EcoMode fuel saving system that minimizes fuel consumption and CO2 emissions by ensuring that the roller does not consume more power than needed at any time. This, together with higher compaction parameters and other improvements, has resulted in a drastic reduction in fuel consumption compared to the previous generation.

BEST POSSIBLE OVERALL ECONOMY
With Dynapac performance, you can achieve first-rate compaction results with maximum uniformity in terms of the bearing strength of each layer, with the best possible overall economy, i.e., lower cost per compacted cubic meter. Mission target reached!

BIG FUEL SAVINGS WITH ECO!
The Atlas Copco Road Construction Equipment division is proud to announce that we have fulfilled our promise to offer customers soil and asphalt rollers with very low fuel consumption. The secret is our EcoMode.

We closely monitored the fuel consumption of the new Dynapac soil compactor range. As a result, we can now confirm that in EcoMode, all the rollers consume 15-20% less diesel fuel than our previous range without EcoMode.

RCE is one of the first manufacturers to equip its rollers with Stage IIIIB/T4i engines with very low emissions. The entire range of the new CA soil compactors have engines of this type.

When using the Eco-system the percentile saving is higher during compaction than during idling and transportation. Combine the 15-20% fuel savings with biodegradable hydraulic oil and very low noise levels and the result are “green” rollers.

Customers who choose the traction/performance package „Anti-spin & ECO” will have EcoMode included. EcoMode always comes with adjustable vibration frequency and a frequency meter. For Stage IV/T4f engines also Traction Control is with EcoMode.
FEATURES AND BENEFITS

**During compaction**

**COMPACTION PERFORMANCE**
Several compaction data to choose among.

**PERFORMANCE/DURABILITY**
Thick drum shell ensures compaction performance and long running time before change.

**PERFORMANCE**
Easy accessible scrapers divided to follow drum movement and replacement at low cost.

**STATIC LINEAR LOAD**
in steps of 5 kg/cm means there’s a machine for all needs.
OPERATOR’S STATION
Three main configurations to choose from, and numerous options.

LIGHTS
Night or day? Choose working/driving lights according to your needs.

ENGINES FROM CUMMINS OR DEUTZ
4 or 6 cylinders, Stage IIIA (Tier3) and up, your choice.

PERFORMANCE
Clean inlet air (combination and cooling) taken in as high as possible.

SAFETY
Sloping engine hood and 1x1 meter view front & rear.

SERVICEABILITY
Cross-mounted engine gives unique service access

SAFETY/PERFORMANCE
Heavy duty rear axle with failsafe brakes.

**AFTER COMPACTION - PROTOCOL**

**DOCUMENTING THE MISSION TO ASSURE QUALITY**

**DYNAPAC’S DOCUMENTATION SYSTEM**
Using the built-in Compaction Meter with Dyna@Lyzer with GNSS, each stage of the compaction work is documented and all measured values can be stored. The analysis function enables the compaction work to be replayed.

**MACHINE USE - LEVEL OF EFFICIENCY**
It enables the complete project to be studied in the office after the task is completed to see how many runs have been allocated over the surface and the level of compaction achieved. It thus provides the opportunity to assess if the roller has been used efficiently.

**ELIMINATING WEAK SPOTS**
Studying the results reveals any areas that may not have reached compaction due to “hidden” weak spots and measures can be taken to remedy this before construction work is carried out on top.

**QUALITY ASSURANCE / ACCEPTANCE INSPECTION**
High quality documentation is generated for quality assurance and as an indication for acceptance inspection. The results from the acceptance inspection can be entered in the Dyna@Lyzer so that the results from quality control can be collected together in one protocol.

---

Tools: PC and data from fifth generation Dynapac CA soil compactors equipped with Dynapac Documentation System.

---

**HAS THE SOIL COMPACTOR BEEN USED EFFICIENTLY?**
**LOCATING POSSIBLE WEAK SPOTS**
**QUALITY CONTROL**
**DATA FOR ACCEPTANCE INSPECTION**
ENGINES FROM CUMMINS OR DEUTZ
The new soil vibratory rollers are the first of their type with cross-mounted engines at the rear — and this provides excellent serviceability. They can be equipped with the latest engine emission stages from Cummins or Deutz.

VERY LOW NOISE LEVEL
The noise level is very low, since the cooling air intake is placed at the top of the hood with the outlet down the sides, combined with the ejector exhaust outlet.

CLEAN INLET AIR
The position of the combustion air intake also has the advantage of keeping the inlet air as clean as possible, an important factor in the dusty environments in which these rollers operate.

ROAD CONSTRUCTION EQUIPMENT SERVICE
Servicing your machines regularly is very important to ensure reliable operation and a long service-life. With pro-active service and preventive maintenance you minimize the risk of high production costs and breakdowns. You can select a service contract that meets your requirement for professional service in order to get the most out of your machine investment.

ALL-IN-ONE BOX KITS
An all-in-one box, tailored to match your equipment. The parts you need, when you need them! An all-in-one box contains all the parts required as part of the equipment’s scheduled maintenance program. When installed by an Atlas Copco certified technician, you keep your downtime to a minimum and your equipment in top condition its entire life.

Easy to obtain and attractively priced, the most effective solution to keep your maintenance budget low.
Find a suitable kit at dynapac.com / kitselector

OPTIMAL WEIGHT DISTRIBUTION AND EASE OF TRANSPORTATION
The cross-mounted engine also gives both optimal weight distribution and ease of transportation as it keeps down machine length. The low profile of the hood gives a 1 x 1 meter view to the rear.

THICK DRUM SHELL
Ensures a long running time before a drum change is required.

DIVIDED SCRAPER BLADE
Keeps drum free of material during operation and can be replaced quickly and at low cost.

FLUIDS
• The right fluid optimizes machine performance
• Simplified selection process, less time spent on finding the right oil
• Delivery in a handy container, no need for transfer from an oil drum
• All-in-one delivery, less time spent on waiting and dealing with different suppliers
• One invoice, less administration
Find a suitable fluid at dynapac.com / fluidselector
Please contact your sales rep for more information.
A NEW LEVEL OF SERVICEABILITY

SERVICE LEVEL ALERT
A service interval alert in the instrumentation display for comfort cabs indicates when service is required and what action to take.

EXCELLENT ACCESS TO ENGINE
The cross-mounted engine at the rear offers excellent access for all service and maintenance needs. The engine hood is easy to open for quick maintenance and the hydraulic pumps are in line with the engine and fully accessible for service.

SUSTAINABILITY PACKAGE
The CA rollers can be equipped with a Sustainability Package featuring an rpm management system, biodegradable fill-for-life hydraulic fluid, 50 hours service kit, electrical engine block heater and working lights with LED lamps.

CONTROLLING LIFE-CYCLE COSTS
Dynapac’s CostCtrl software on the web and service contracts, including extended warranty, enable you to gain full control over life-cycle costs and maximize machine availability.

WHEN YOU NEED US, WE’RE THERE
Dynapac’s international service network offers full support and assistance with all parts and service needs.

### Engines

- **I/III/T3 or IIIB/T4i or IV/T4final**

### Drums

- **Smooth (D)**
- **DCO (CA3500/4000/5000/6000)**
- **Padfoot (PD)**

*PD is not available for CA2500 (3.3) / 2800*

### Traction Systems:

- **Antispin / ECO**
- **Traction Control or Traction Control/ECO (Stage IV/T4f)**
- **Dual Speed**

### Traction Control or Traction Control/ECO (Stage IV/T4f)

- No Spin rear axle (Deutz)
- Limited slip rear axle (Cummins)
- Speed limiter
- Tilt Indicator
- Separate choices:
  - Gradeability Indicator
  - Tyres

### Drums

- Dual speed
- Limited slip rear axle
- Separate choices:
  - Tyres

### Operator Platforms

- Cab
- Comfort Cab
- ROPS/FOPS

### Cab

- ** INCLUDED**
  - Heating: 6 nozzles
  - Floor mat: Standard 5 mm
  - Panels: Back cover
  - Inner roof: Noise absorbing
  - Internal rear view mirror: CE-marked
  - Hooks: Two
  - Charger socket: One 24V, One 12V
  - Interior light: Door w. timer, reading, night light
  - Entry light on footsteps/ladder/battery cabinet
  - Storage: Back cover, side panel, back upper shelf
  - Sun protection: Front screen print, sun visor front, sun curtain back
  - Wipers: Front/rear + Interval front
  - Operator’s seat, suspension
  - Seat belt 3” with buzzer
  - Working lights LED
  - Rotating beacon dual LED
  - Service interval /daily check in display
  - FM/AM radio with MP3/USB and Bluetooth
  - Cooling box
  - Foot rest
  - Ipod/MP3 holder

### Cab Features Plus Below

- **INCLUDED**
  - Floor mat: Standard 5 mm
  - Panels: Back cover
  - Charging: 24V
  - Steering wheel: Adjustable
  - Storage: In back cover
  - Sun protection: Front screen print, sun visor front, sun curtain back
  - Wipers: Front/rear
  - Operator’s station, fixed or rotating
  - Operator’s seat, suspension
  - Seat belt 3” with buzzer
  - Working lights LED
  - Rotating beacon std.
  - Service interval /daily check in display
  - FM/AM radio with MP3/USB and Bluetooth
  - Cooling box
  - Foot rest
  - Ipod/MP3 holder

### OPTIONS

- 50 hours Service kit & tool box
- Bolt-on padfoot shell (CA1500D-CA5000D)
- Certificate, SBF 127 (Swedish)
- Compaction Meter with ABC
- Dyn@Lyzer, preparation
- Dyn@Lyzer, complete installation
- Decal, risk location
- Emergency stop, dual external
- Engine block heater (120 v or 240V)
- Environmental Certificate (Swedish)
- Fire extinguisher
- First aid box
- Fuel tank drainage
- GNSS for Dyn@Lyzer
- Gradeability indicator
- Hearing protector
- Heater, socket (240V) for Cabs
- Hydraulic fluid, bio
- Lights, licence plate
- Lights, reversing, LED
- Scrapers, fixed steel, smooth
- Scrapers, flexible, smooth
- Scrapers, fixed steel, pads
- Scrapers, heavy duty, pads
- Sign, Slow Moving Vehicle
- Special Colour, one colour
- Special Colour, two colours
- Tachograph
- Tachograph, preparation
- Tool box
- Tool set
- Field kit, Bolt-on padfoot shell (CA1500D-CA5000D)
- Field kit, Drum conversion, D to PD (CA5500-CA6500)
- Field kit, Drum conversion, D to PD (CA5500-CA6500)
