

Hiab Multilift Easycover Automatic load covering system

Automatic load covering system Hiab Multilift Easycover

Hiab Multilift Easycover represents the latest cutting edge technology in its field and offers an ingenious load covering system that truly is simple and safe to use. This system has no vulnerable side arms as traditional systems, so you can rest assured that Hiab Multilift Easycover meets all your performance and quality requirements. In fact, covering the load couldn't be easier!

The key benefit of Hiab Multilift Easycover is the safety of operation. No more need to climb on the demountable body when covering the load. Easycover takes care of covering on your behalf - quickly, safely and easily. What is more, Easycover can be mounted on either truck or trailer - it is also suitable for fixed body vehicles. The system is designed so that it suits for covering different

body lengths and heights. The system is supplied with its own power pack, which makes the system independent from the main hydraulic supply. Fitting the truck with an Easycover system is easy: no extra space is needed on the sides of the body. Therefore Easycover can easily be retrofitted on a truck already in service.

Operating Easycover is easy:

the cover is first raised to the desired height by the pedestal body, it is then pulled open over the body with the help of the boom mechanism. The cover is fastened onto the sides of the body after which the mechanism can be drawn in. The mechanism stays in rest position during transport.

Radio remote control

Easycover is operated with a handy, easy to use radio remote control. For service and emergency use purposes there is a fixed control unit in the power pack.

System at a glance

Basic system

- Boom mechanism
 - in rest position during transport
 - no vulnerable side arms
- Telescopic pedestal body
 - makes the system suitable for different body heights
- Controls
 - hydraulically operated
 - radio remote control
 - fixed control unit in power pack for service purposes
- Power pack
 - independency from main hydraulic supply

Features at a glance

- Safe to operate
 - no climbing on the demountable body
- Versatile
 - can be used on truck or trailer
 - covers demountable bodies of different heights and lengths
- Limited space requirement
 - no arms on the side
 - easy retrofitting

Cargotec improves the efficiency of cargo flows on land and at sea – wherever cargo is on the move. Cargotec's daughter brands Hiab, Kalmar and MacGregor are recognised leaders in cargo and load handling solutions around the world. Cargotec's global network is positioned close to customers and offers extensive services that ensure the continuous, reliable and sustainable performance of equipment. www.cargotec.com
